

SUPER LUBE® LOW TEMPERATURE OIL

Super Lube® Low Temperature Oil is ideal for torque sensitive applications that are operating at low temperatures and require a thin oil that will not cause drag or binding due to viscosity.

Super Lube® Low Temperature Oil operates from -85°F(-65°C) to 204°F(95.5°C).

Super Lube® Low Temperature Oil has a viscosity of 4cSt @ 100°C and 2500cSt @ -40°C.

Super Lube® Low Temperature Oil is USDA/NSF rated H-1 for incidental food contact.

Key Features:

Low breakaway torque

Protects metal surfaces

Reduces power consumption

Improves oxidation stability

Inhibits corrosion

Reduces friction

Extends equipment life

Improves power

Super Lube® Low Temperature Oil is available in the following sizes:

74050.....5 gallon pail

74055.....55 gallon drum
