

SECURE ALUMINUM ENCLOSURES CARE AND MAINTENANCE RECOMMENDATIONS

Your Deluxe Secure Aluminum Enclosure contains moving parts and some non aluminum parts that are subject to oxidation

In order to ensure your long lasting enjoyment of this product we recommend that you apply a liberal amount of Non Toxic Super Lube Synthetic oil or grease (or an equivalent non toxic product to the enclosure locking latch as well as the quick connect pin locks and the metal base of the carry handles

It is important that you reapply the lubricant/protection on a reasonably regular basis if you are planning to use and leave the product outdoors

From time to time it is also prudent to lubricate the top and bottom joints on each section of your enclosure.

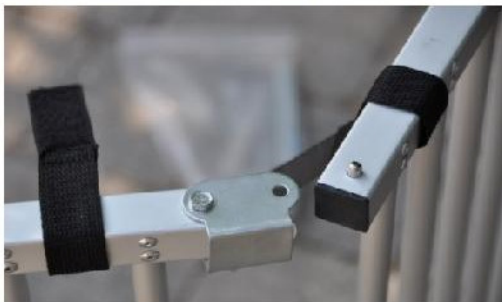

Please Lubricate:

Base of Handles

Gate lock mechanism

Pin lock mechanism
